

THE SPRING 2016 MAPPING FOR RESEARCH SERIES

Get.Into.Spring with G.I.S and your research

Spring is in the air and there is no better time to think about how mapping could impact your work.

Join us this April and dive into the world of mapping. Explore the latest digital mapping technologies and make your research project come to life.

This series will feature:

- Overview of historical maps, digital mapping, and UCLA resources supporting GIS and spatial thinking
- Engaging in lightning talks with current researchers utilizing maps
- Visualizing methods with CartoDB and Palladio

Our focus will be on spatial technologies, as well as fostering discussions on various approaches for research projects.

These free sessions are being co-sponsored by UCLA's Institute for Digital Research and Education and the UCLA Library.

FRIDAY APRIL 15TH

3PM – 5PM

INTRO TO MAPS: HISTORY AND BEYOND

Learn about mapping history, resources, and software

FRIDAY APRIL 22ND

2PM – 4PM

MAPPING APPLIED: EARTH DAY LIGHTNING TALKS

Listen and engage with speakers on their research related to the environment and their mapping practices

FRIDAY APRIL 29TH

3PM – 5PM

GOT CARTODB? METHODS IN MAPPING DATA

Explore the use of CartoDB and Palladio for generating visually appealing online maps

Date/Location

April 15th & 29th:
WEC, Room 23167, Charles E.
Young Research Library, 2nd Floor
April 22nd: DeCafe, Perloff

Seating is limited please RSVP:
